

Website SEO Audit & Results

www.suntrik.com · Audit 23 Sep → fixes live 25–26 Sep 2026

Scores use the open-source claude-seo audit method (weighted 0–100). Lighthouse figures are lab tests on the live site.

~30–35

Before (25 Sep)

Estimate — Google saw every page as a copy of the homepage

72

Mid-day audit (26 Sep)

After pre-rendering, host and sitemap fixes

84

Final score (26 Sep)

After content, schema, image and local fixes

11 / 11

Pages Google can read

Own title, canonical and full text (was 1 of 10)

100

Lighthouse SEO, every page

Accessibility 99–100 on all pages

52 → 78

Local SEO

Website now linked to the Google Business Profile

Bottom line: the technical problems that kept suntrik.com almost invisible in Google are fixed and live. The next gains depend on management decisions (verified claims, one business name and phone number across listings, a named author) and on steady content and reviews — not on more code.

1. Executive summary

An external audit on 23 September 2026 found that Google treated every page of suntrik.com as a duplicate of the homepage. Only the homepage and one old blog post were indexed, and generic searches such as “solar company Sirsa” returned JustDial and a competitor instead of Suntrik. Between 25 and 26 September every technical finding was fixed and deployed, the site was re-audited, and it now scores **84/100**.

What was wrong

- Every URL sent Google the homepage’s title, description and canonical tag — telling Google that all pages were copies of the homepage.
- No text in the HTML: content appeared only after JavaScript ran, so search and AI crawlers saw an empty page.
- Two hosts (suntrik.com and www.suntrik.com) both served the site; the sitemap was incomplete and undated.
- Business name, address and phone differed between the website and listings; some published claims could not be verified.

What was done

- **Every page now ships its own HTML** — title, description, canonical, social tags, structured data and full text (e.g. PM Surya Ghar page: 0 → 1,376 words visible to Google).
- **One host** (www.suntrik.com), permanent redirects for old URLs, real 404 pages, and an auto-generated sitemap with dates.
- **Local search:** new Sirsa landing page; website linked to the Google Business Profile (4.9 of 5 from 35 reviews) with matching address, hours and map pin.
- **Content:** both scheme guides rewritten with 2026 figures and government sources, incl. Haryana’s extra state subsidy; an incorrect PM-KUSUM subsidy statement corrected.
- **Speed and accessibility:** fonts self-hosted, all 115 images converted to WebP, mobile fixes; accessibility 99–100 on every page.
- **Claims:** “NISE-certified” removed site-wide at management’s request.

Decisions needed from the Board

#	Decision	Why it matters
1	Confirm with documents, or remove: “80 MWp”, “150 MW+”, “1,000+ clients”, “100% on-time”, “ISO”, “India’s Most Trusted”	Unprovable claims are a trust and compliance risk and weaken Google’s quality assessment
2	One public name and one phone number on every listing (Google, JustDial, Facebook, Instagram, Bing)	Google matches a business across sources by name, address and phone; JustDial still shows the HR number
3	Name an author (e.g. a director) for blog articles	Anonymous articles score lower for expertise and are cited less by AI answers
4	Approve a content cadence: 2 articles a month on Haryana solar topics	Content is now the lowest-scoring category (70)

2. Scorecard

The weighted SEO Health Score rose from 72 at the mid-day audit to 84 after the final round. On-Page SEO (+20), Schema (+17) and Images (+16) moved most; Content (70) and AI Search Readiness (72) remain the weakest.

*Local SEO is scored separately and is not part of the weighted total. The pre-fix state (25 Sep) was not scored per category; its overall ~30–35 is an estimate.

Category	Weight	Mid-day	Final	Change	Main remaining gap
Technical SEO	22%	88	95	+7	Minor: two-hop redirect from the bare domain
Content Quality	23%	58	70	+12	Only 3 articles; anonymous author; unverified claims
On-Page SEO	20%	70	90	+20	Some page headings are slogans without keywords
Schema / Structured data	10%	75	92	+17	Named author (Person) not yet possible
Performance (Core Web Vitals)	10%	78	80	+2	Homepage on mobile: main text appears at ~4.3 s
AI Search Readiness	10%	62	72	+10	Author bylines; small presence beyond own site
Images	5%	72	88	+16	Width/height not set on some images (no visible impact)
Weighted total	100%	72	84	+12	
Local SEO (separate)	—	52	78	+26	JustDial phone/address; review pace; Apple Maps

3. Before and after — measured on the live site

Each “after” figure was measured on www.suntrik.com after deployment on 26 September 2026. “Before” is the 23 September audit unless marked.

Measure	Before	After
Pages with their own title, description and canonical	1 of 10	11 of 11
Words Google sees on the PM Surya Ghar page (no JavaScript)	≈ 0	1,376
Hosts serving the site	2 (split)	1 (www), other redirects
Sitemap URLs with a last-modified date	0 of 10	11 of 11
Unknown URLs	Homepage with status 200 (“soft 404”)	Proper 404 page
Structured-data types	1 (LocalBusiness)	8 (Organization, LocalBusiness, WebSite, FAQPage, BlogPosting, BreadcrumbList, JobPosting, Service)
Scheme guides — length	414 and 395 words	1,245 and 929 words, with sources
Gallery / project photos	45 JPG files, 8.6 MB	WebP, 4.7 MB; all 115 page images WebP
Homepage Lighthouse, mobile — performance*	45	70–78 (varies by run)
Homepage Lighthouse, mobile — accessibility*	86	100
Homepage first content on mobile*	4.9 s	2.9 s
AI crawlers (ChatGPT, Claude, Perplexity) receiving full page text	No	Yes — all six tested
Website linked to Google Business Profile	No	Yes — address, hours, map pin, reviews link

*Lighthouse “before” was measured on the morning of 26 September, after pre-rendering but before the speed fixes.

Lighthouse by page (mobile, final)

Desktop homepage performance: 89. Layout shift is 0.00–0.01 on every page. Google’s “good” target for main content is 2.5 s.

Page	Performance	Accessibility	Best practices	SEO	Main content shown
Home	71	100	100	100	4.3 s
Solar company in Sirsa (new)	88	100	100	100	3.2 s
Projects	89	100	100	100	3.0 s
PM Surya Ghar	82	100	100	100	3.3 s
PM-KUSUM	83	100	100	100	3.4 s
Commercial & industrial	85	100	100	100	3.5 s
Careers	91	100	100	100	2.7 s
Blog	85	100	100	100	3.4 s
PM Surya Ghar guide	86	99	100	100	3.5 s
PM-KUSUM guide	86	99	100	100	3.3 s
80 MWp update	86	100	100	100	3.3 s

4. What changed

Area	Change
Indexing	Every route pre-rendered at build time with its own head tags and full body text; per-route titles and descriptions; client navigation keeps tags in sync
Host & URLs	www.suntrik.com is the single host; old URLs (/about, /contact, /services, old O&M post) redirect; real 404 page; clean URLs
Sitemap & crawl	Sitemap generated from routes with dates (11 URLs); robots.txt; llms.txt for AI assistants
Local	New /solar-company-sirsa page (services, process, office, FAQ, map, reviews); homepage copy names Sirsa and Haryana; address, hours and map pin match Google
Content	PM Surya Ghar guide for Haryana (central + state subsidy, steps, worked example, sources); PM-KUSUM guide (Components A/B/C, 2027 extension, sources); C&I page (CAPEX vs OPEX, net metering vs open access); Projects summary
Accuracy	Removed "NISE-certified" everywhere; corrected PM-KUSUM Component A subsidy; removed placeholder "CIN: [on file]" and dead links; navbar subsidy wording
Structured data	Organization, LocalBusiness (name, address, geo, hours, profiles), WebSite, FAQPage, BlogPosting, BreadcrumbList, JobPosting (5 roles), Service
On-page	Unique H1 per page; titles ≤ 65 and descriptions ≤ 155 characters; blog posts linked from /blog; scheme pages and guides cross-linked
Speed	Self-hosted fonts (removed a render-blocking Google Fonts call); WebP images (e.g. team photo 231 KB → 14 KB); long-lived caching; intro animation skipped on phones
Mobile & accessibility	About section readable on phones; WhatsApp button moved; text contrast, form labels, heading order; security headers added

Traffic baseline to track against

Vercel Web Analytics, 30 days to 26 September 2026: **326 visitors**, 593 page views, 69% bounce rate; Google was the top source (117 visitors), followed by LinkedIn (25) and ChatGPT (10); 36% of visitors were on mobile. Ranking effects usually appear over 2–8 weeks as Google recrawls; review these figures and Search Console monthly.

5. Local search (Sirsa)

Suntrik's Google Business Profile is claimed and active: **"Suntrik Solutions", Solar Energy Company, 4.9 of 5 from 35 reviews**, owner replies, phone +91 75037 39000, open Monday–Saturday 10 am–7 pm. The website was not connected to it; it now is.

Signal	Website	Google	JustDial	Status
Name	Suntrik Solutions (structured data); Suntrik Green Energy (brand)	Suntrik Solutions	Suntrik Solutions	Aligned
Address	Rania Bazar, B Block, Subhash Chowk, Sirsa 125055	Same	Near Red Cross Office, Rania Bazar	Update JustDial
Phone	+91 75037 39000	075037 39000	87086 05564 (HR)	Update JustDial
Hours	Mon–Sat 10 am–7 pm	Same	—	Aligned
Map pin & reviews link	On the Sirsa page and in structured data	Source	—	Done

Local actions

- Update JustDial to the main phone, email and the Google address wording (largest remaining mismatch).
- Edit the Bing Places description, which still says "NISE-certified" (copied from the old website).
- Ask every customer for a Google review after commissioning — the newest review is about four months old.
- Create an Apple Business Connect listing with the same name, address and phone.
- When real local projects exist, add Hisar, Fatehabad and Bathinda pages (thin copies would hurt rankings).

6. Next steps

Priority	Action	Owner	Effort	Category lifted
High	Decide on unverified claims; remove or evidence each	Board	1 meeting	Content
High	Align JustDial / Bing / Facebook with Google name, address, phone	Marketing	1–2 hours	Local
High	Resubmit sitemap in Search Console; request indexing for new and rewritten pages	Web	30 min	Indexing
High	Named author and short bio for articles	Board + Web	1 hour	Content, AI
Medium	Two articles a month on Haryana solar topics	Marketing	2–3 hrs each	Content, AI
Medium	Review request after every installation	Operations	Ongoing	Local
Medium	Homepage mobile speed: reuse pre-rendered HTML instead of rebuilding it	Web	1–2 days	Performance
Medium	LinkedIn company page, Apple Business Connect	Marketing	2 hours	AI, Local
Low	Project case-study pages; Hisar / Fatehabad / Bathinda pages with real projects	Web + Ops	½ day each	Content, Local
Low	Hindi versions of the scheme pages	Web	1–2 days	Content

Method and limitations

Scores follow the claude-seo “seo-audit” method (Technical 22%, Content 23%, On-page 20%, Schema 10%, Performance 10%, AI readiness 10%, Images 5%), applied by crawling all 11 URLs as raw HTML, running Lighthouse 12 on every page, and checking headers, redirects, structured data and AI-crawler access. Category scores are an assessment against that method, not a Google metric. Search Console, rankings and backlink data were not available for this audit; lab performance figures vary by about ± 5 between runs. Subsidy figures in the rewritten guides are sourced from MNRE, the PM Surya Ghar portal and DHBVN Sales Circular D-20/2024.
